Practice Areas

Air Quality & Climate Change | CEQA / NEPA | Endangered Species | Energy | Energy Project Development | Environmental Enforcement Defense | Environmental Remediation & Due Diligence | Environmental/Toxics Litigation | Infrastructure | Pipelines & Terminals | Proposition 65 | Recycled Water | Water Law | Water Quality Law

Patrick Veasy assists clients facing complex environmental compliance, regulatory, and litigation issues to identify pragmatic solutions and achieve effective results.

Patrick represents and assists public and private sector clients in environmental compliance and enforcement matters involving administrative agencies, and in state and federal court. His practice focuses on water quality issues under the California Porter-Cologne Water Quality Control Act and federal Clean Water Act in relation to administrative and judicial enforcement matters, as well as petitions challenging final agency actions. Patrick routinely works on cases involving municipal wastewater, industrial process water, and all types of storm water discharges (municipal, industrial, and construction). In his practice, Patrick also represents clients on environmental site remediation issues involving soil and groundwater contamination, including at underground storage tank and chlorinated solvent sites, and involving emerging contaminants, such as per- and poly-fluoroalkyl substances (PFAS). Finally, Patrick has experience assisting clients on other environmental compliance and enforcement matters under the Clean Air Act and California's Proposition 65. Due to the complex nature of his practice, Patrick routinely works with technical consultants as part of a multi-faceted, collaborative approach to provide creative, practical, and cost-efficient counsel to his clients.

Experience

Enforcement Defense

- Defended multiple public and private sector clients in third party citizen suits and agency enforcement actions for alleged violations of the Clean Water Act, NPDES permits, and the California State Water Resources Control Board's General Permits for municipal, industrial, and construction related storm water discharges, as well as the State's SSO WDR for Sanitary Sewer Overflows (SSOs).
- Defended multiple property owners in different administrative and judicial enforcement actions alleging violations of the Clean Water Act, California's Fish & Game Code, and Water Code involving the dredge and fill of wetlands and ponds.

- Represented various clients in lawsuits filed under California's Proposition 65 for failure to warn and/or the alleged unlawful discharge of chemicals to drinking water.
- Assisted two separate electric power utilities in enforcement litigation under the Clean Air Act and related State Implementation Plans.

Site Contamination and Remediation

- Represented and advised multiple clients on environmental compliance and litigation matters involving groundwater, soil, and/or soil vapor contamination from various contaminants such as petroleum hydrocarbons, chlorinated solvents, PFAS, and related remediation efforts.
- Advised clients on underground storage tank issues including the State Water Resources Control Board's Underground Storage Tank (UST) Cleanup Fund and Low Threat UST Closure Policy.
- Represented various clients to pursue and obtain site closure or no further action from federal, state and local regulatory oversight agencies.
- Advised multiple clients on due diligence issues related to the purchase and sale of real property with environmental site contamination issues.

Environmental Review and Permitting

- Assisted clients in major development projects involving CEQA, NEPA, FAST-41, related environmental review, permitting, and regulatory issues, as well as multiple federal, state, and local agencies.
- Drafted multiple petitions challenging NPDES and WDR permit requirements before the California State Water Resources Control Board.
- Advised clients on achieving compliance with California air district permit requirements.

Final Agency Actions and Rulemakings

- Assisted with defense of municipal client in CEQA litigation involving recycled water irrigation program.
- Drafted multiple petitions challenging final agency actions before the California State Water Resources Control Board.
- Assisted natural gas pipeline company before state environmental hearing board in plan approval permit appeal.
- Represented municipal association in litigation challenging United States Environmental Protection Agency's use and promotion of guidance document in NPDES permits.
- Drafted multiple briefs challenging final agency action before the United States Court of Appeals for the Ninth Circuit.
- Represented multiple clients in petitions for review of United States Environmental Protection Agency final action before the United States Court of Appeals for the District of Columbia Circuit.

Compliance Counseling

- Assisted multiple clients with NPDES and WDR permit compliance issues.
- Advised multiple clients on achieving compliance with California's Proposition 65.
- Assisted clients in achieving compliance with California air district permit requirements.
- Assisted client with voluntary self-disclosure of regulatory violations under United States Environmental Protection Agency Audit Policy.

Other Litigation Experience

- Briefed demurrer in state court resulting in voluntary dismissal of complaint.
- Briefed and assisted client at evidentiary hearing before federal district court to successfully defend against motion for preliminary injunction.
- Represented and assisted multiple clients in all phases of pre-trial litigation, including discovery and pre-trial motion practice.
- Briefed multiple motions for summary judgment in state court.
